

# MULTIPLANT / AUTOPLANT AUTOCAL

## Parallel and Real Time Calorimetry in High-Precision

### Customer testimonial

"I believe we did the equivalent of 6 years work in about 1 year. This is a huge competitive advantage - we can no longer imagine how to do our work without Chemspeed automation."

# Robustness and Ease-of-Use by Design

The leading technology in overhead gravimetric dispensing / dosing (patented) combined with our reactor and process excellence, and our user-friendly software, allow you to standardize and accelerate your calorimetry workflows.

Precision – Speed – Accuracy  
Performance – Versatility – R&D Cost Savings  
High-Output

## Key Advantages:

- Decrease in cost per experiment up to 90+ %.
- Increase in productivity by a factor of 10+.
- Up to 36 experiments per run on an *AUTOPLANT*, up to 6 experiments per run on a *MULTIPLANT*.
- Independent control of all process parameters in each reactor with calorimetry and e.g. NIR, PSD, pH.
- Independent and precise temperature and stirring control in each reactor.
- Up to 8 independent gas, liquefied gas and liquid feeds per reactor.
- Gravimetric solid and viscous liquid dispensing.
- 4-Needle Head for volumetric liquid handling and sampling.
- Feeding and sampling under reaction conditions.
- Cleaning in place (e.g. automated cleaning, inserts).
- Dispensed amount, stirrer speed, temperature, pressure, time..., and other data are stored in a read only log file.
- Easy access to data with a convenient interface to pull results into Excel or virtually any other software.
- Interface to DOE.

## Enhance your Efficiency and Productivity with our Workflow Solutions!

Calorimetry measurements

## Assembly of a process research reactor with our unique screwless and self-sealing design up to 100 bar

Choose and insert stirrer

Mount cylindric magnetic stirrer drive

Plug in reactor

Screwless closing and self-sealing of reactor

Add safety lock

Screwless mounting and self-sealing of multiport drawer valve

No screws  
No gear wheel  
No transmission belt  
Self-sealing

Robustness and Ease-of-Use by Design

## Technical Details

Chemspeed's **MULTIPLANT/ AUTOPLANT AUTOCAL**'s deck modularity allows the user to execute and perform a variety of calorimetry workflows in a fully or semi-automated fashion.

The synthesis of most organic compounds including the following steps can all be fully automated on the **AUTOPLANT AUTOCAL** (parallel, high-performance calorimetry data at each step):

- Addition of liquid reagents and / or suspensions.
- Reaction under reflux at ambient or elevated pressure with optional Dean Stark water removal or distillation.
- Calorimetry.
- pH monitoring and control.
- Sampling.
- Vessel-to-vessel transfer for multistep reactions.
- Workup with filtration, evaporation or drying.

**MULTIPLANT** dimensions:

940 x 600 x 1'920 mm  
(3'1" x 2'0" x 5'4")

**AUTOPLANT** dimensions:

2'350 x 950 x 1'920 mm  
(7'70" x 3'2" x 6'4")

Process development workstation for 6 X 100 mL, 3 X 250 mL, 3 X 1'000 mL

The cutting edge **Process Development Workstation Technology** allows scientists to truly mimic the final industrial production process and provides all the flexibility to optimize integrated reaction sequences, even if a complex configuration of reactors and feed vessels required.

Materials of choice: glass, stainless steel (PEEK, PTFE or glass inserts available), Hastelloy, others on request

**Process reactor** assembly, individually controlled tank reactors (reactor volumes 100, 250, 1'000 mL) with precise, continuous feeds.

- Flexible and precise continuous feeds, down to 10  $\mu\text{L}$  / min.
- Up to 8 continuous liquid and / or gas feeds per reactor and additional unlimited overhead access.
- Accurate and reproducible temperature control, 0.1  $^{\circ}\text{C}$ .
- Pressure up to 100 bar over the entire temperature range up to 250  $^{\circ}\text{C}$  with corresponding safety installations.
- Parallel high-performance calorimetry, NIR, PSD data.
- Viscosity data.
- Dean Stark water trap.
- Distillation bridge between 2 reactors.

Calorimetry probe

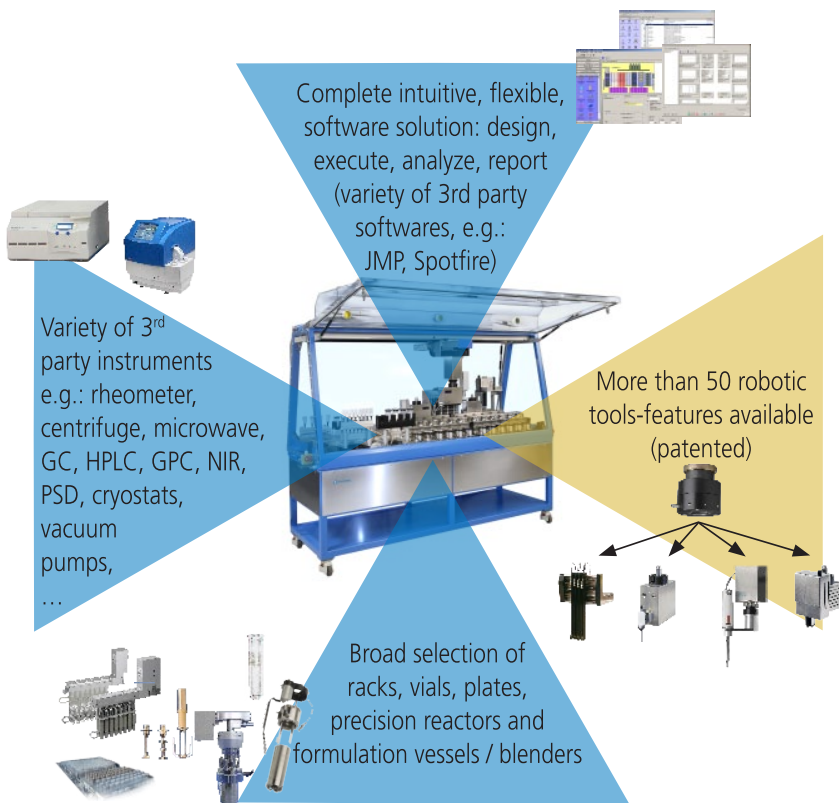

Easily exchangeable stirrer designs (anchor, twisted blade, gas entrainment stirrers...). Powerful mixing for viscosities up to 80 Pa-s at 300 rpm and 30 Pa-s at 900 rpm with an anchor stirrer.

Automated parallel sampling - Collection rack: consists of 144 x 2 mL

# 4 Dimensions of Modularity and Flexibility

## – Off-the-Shelf-Design –

- Individual platform configuration tailored to your workflow with market-proven off-the-shelf components.
- Robotic platforms which can easily be integrated with one another to enable multi-workflow processes (e.g. Formulation, Application and Testing procedures all integrated in a single platform).

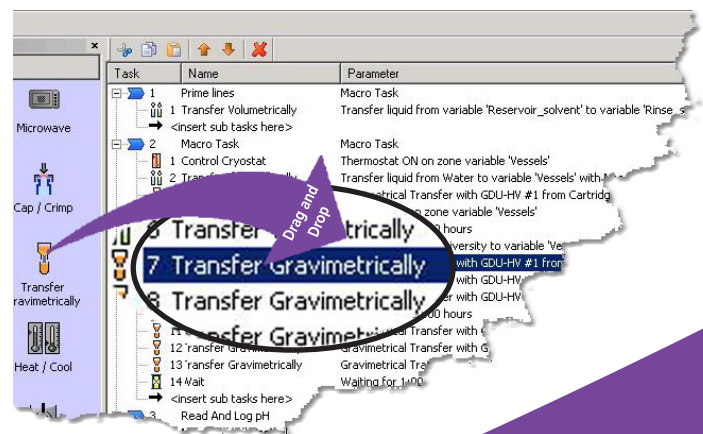

## Complete Software Solution: Design, Execute, Analyze, Report

Chemspeed's AutoSuite User Interface & Executor software packages execute and control all modules of the entire product development cycle. They control all Chemspeed robotic platforms and any other integrated 3rd party software and hardware.

AutoSuite *MULTIPLANT/ AUTOPLANT* is a software with a user friendly interface which allows easy workflow oriented programming. Many features such as gravimetric dispensing are automatically calibrated, eliminating tedious optimization steps.

- The AutoTeaching tool simplifies dispensing applications without manual trials and is applicable to e.g. solids eliminating the need for manual optimization before the dispenses are done.
- **Easy programming: drag-and-drop workflow steps or just execute standard workflow protocols.**
- Barcode tracking.
- Easy integration with virtually any LIMS or ELN software.
- AutoSuite Application Programming Interface (API) for 3rd party software and hardware integration.
- Optional, Chemspeed VLab for DoE and Data Analysis / Reporting. It includes a full document management system (electronic lab-journal) and is 21 CFR Part 11 compliant. The software scales from a single PC to large network installations with multiple hardware and clients.

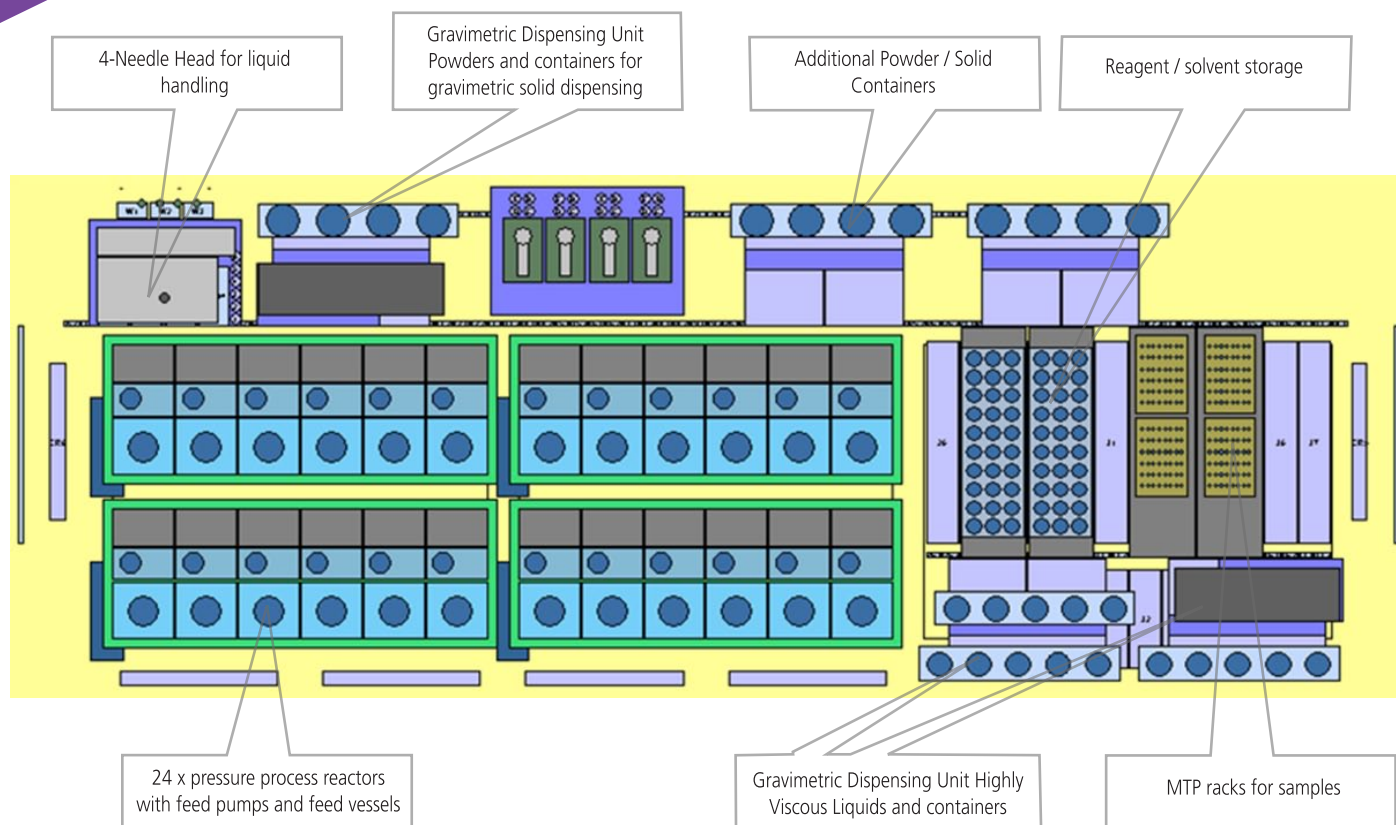

## Easy Programming – Intuitive interface

## Platform Configuration Example

A typical **AUTOPLANT AUTOCAL** deck consists of up to 36 independently controlled tank reactors, along with reagent / sample and solid dispensing container racks. Tools include a 4-Needle Head for liquid additions, Solid Dispensing Unit for liquid additions, Solid Dispensing Unit for the addition of solid reagents.

All tools and accessories from Chemspeed's **SWING, ISYNTH, FORMAX, APPLICATOR** and **INVESTIGATOR** platforms are fully compatible with the **MULTIPLANT / AUTOPLANT AUTOCAL** platforms and vice versa.

Example upgrade options:

- Various reactor materials and coatings are available (glass, hastelloy, Teflon, PEEK,...).
- Multiple stirrer designs and materials.
- Large choice of sample, reagent, and customized racks.
- Integrated centrifuge for washing.

## Variety of Plug-in (3rd Party) Solutions

Chemspeed integrates a large number of 3rd party components either on and / or off the deck.

Available upgrade options:

- Large number of on-line analytical probes (e.g. NIR, PSD, pH).
- Cleaning module.

# Robotic Tool-Features

More than 50 robotic tool-features can be integrated with Chemspeed's unique robotic tool exchange technology, including unrivaled overhead gravimetric dispensing, which can operate while mixing, heating, refluxing and cooling. Virtually any combination of these robotic tools is possible.

Highlighted are the most common and recommended robotic tool-features for the **AUTOPLANT AUTOCAL** robotic platform.

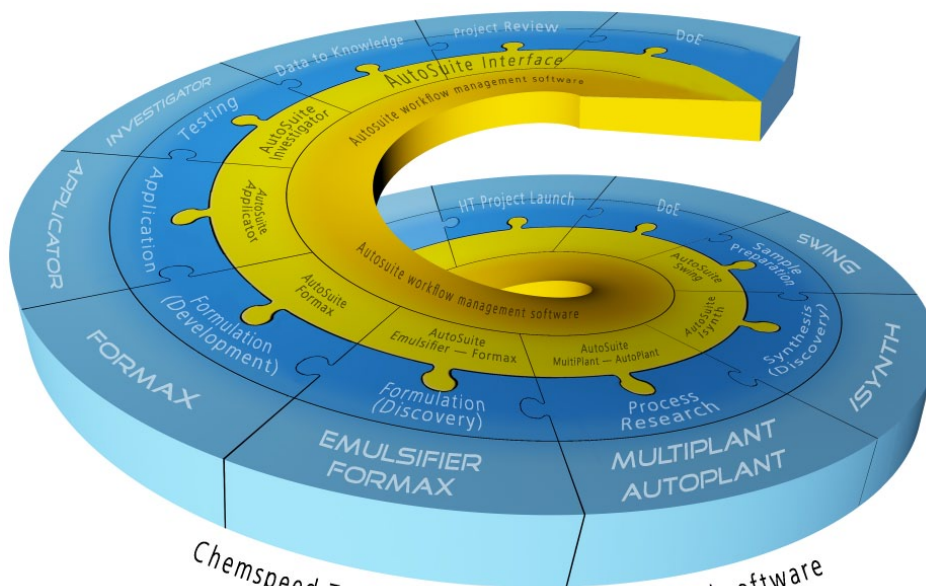

Robotic tool exchange interface (proprietary)

15+ Years of Experience in Automated Chemistry.  
 Customized Workflow Solutions.  
 Swiss Quality Products.  
 An International Team of Highly Experienced Chemists.

Chemspeed Technologies AG is the leading provider of high-throughput and high-output research & development workflow-solutions from single bench-top / standalone automated workstations (powder dispensing - sample preparation- synthesis - process development - formulation - application - testing) up to complete and integrated product development workflows for the entire product development processes in the chemical, material science, renewables & energy, pharmaceutical, agro-chemical, specialty chemical, home care, cosmetics and nutrition industries, as well as academia.

*Chemspeed Technologies offers hardware and software for every step in the product development cycle*

Discover our enabling portfolio for the entire product development cycle!
